Title:

Comments: Hello, as a climber who recreates in wilderness areas I would like to ensure that safe and responsible use of bolts and anchors will be available for me to use so that I will be able to recreate safely.

With the current legislation, I am afraid that my ability to protect myself is at risk and worried of the repercussions

I have developed routes in wilderness areas and often times the location of anchors and bolts is unknown until in the act of climbing.

This matter will affect how I vote in the future.
