Comments: The feeding grounds are important for our elk and bison herd.. It's a viable resource not only for our environment and our eco system. Taking away the feeding grounds is like taking away the food pantry for the homeless. They have learned that by going there they are fed, by not doing this they will starve. If this happens they will start searching, ending up in peoples back yards, on the highways and other such areas. This will then lead to damages far beyond our control, insurance, and beyond. This is something as an outdoorswomen I don't want to see happen.. Being an outdoors women is a way of life for some of us, taking the feeding grounds away is also going to hurt both human and animal..
