First name: Lauri

Last name: Schell

Organization:

Title:

Comments: It pains my heart that we continue to allow more roads, more drilling, which in turn brings noise, air, and water pollution to our public lands. For all of us who enjoy our forests for hiking, riding, walking our dogs, the thought of even MORE destruction is so short sighted.

Its well past time to look toward a future of alternative energy, and wean ourselves from our dependence on oil and gas.

Please consider the future for all of us, human, and animal.
