Comments: We have been trying to defend the HD hills for many years. In my opinion the Forest Service and other agencies have often tried to circumvent the reasonable and clearly stated requirements of our environmental protection laws. Here again we are asked to ignore further disruption of our forest by allowing this project to proceed without proper and timely study.

In this time of 'climate Uncertainty' or "climate catastrophe" we should be ever more careful and strict regarding projects like the Catamount wells and roads in the HDs.
