I am the mother of a dedicated climber. Please do not make climbing more dangerous than it already is by implementing a policy that will make it more difficult for the climbers, but also for the mothers. I am proud of my son. I know that he has found something that is healthy and both physically challenging and mentally challenging. Having dedicated routes with climbing assists that are maintained by the climbers is extremely important. Please keep the routes as safe as they are now.

Thank you,

Lily
