Last name: McGaffey

Organization:

Title:

Comments: As an older mature person these bolted routes provide me a safer opportunity to continue climbing. I think of the bolted routes as vertical paths or trails. As with all trails/paths, they require some maintenance to allow continued access. These routes are put up with thoughtful consideration of safety and respect to minimize damage to the rock. Please don't take these opportunities away from the wonderful thoughtful people that happen to choose climbing as their passion in life that takes us out into these beautiful places.
