First name: Erik

Last name: Knall

Organization:

Title:

Comments: As a rock climber and respectful user of the forest service, I oppose the proposed directive. While well-intended, the directive as proposed is misguided. I believe that organizations like the Forest Service should partner with local, knowledgeable experts to create bespoke, locally-relevant systems that effective through their simplicity. The current proposal would be unwieldy and generate unnecessary, ineffective, and misdirected red tape.
