Title:

Comments: I have been an avid climber and outdoor enthusiast most of my life and although it's "convenient" I too agree that damaging rocks and nature is not in everyone's best interest. I do feel climbers should be able to continue with a simple rule - pack it in and pack it out. You should not be able to leave any type of gear behind. I do fear that this ruling might try to limit top topping anchors or the use of cams in cracks.
