Comments: These new interpretation of old laws will cause people to die, and put countless more at RISK! Please stop this nonsense. Beautiful iconic routes will fade into history and that is unacceptable. forest service's job is to maintain the forests. These anchors are essential to accessing parts of your forests and cannot be maintained without them!!!!

You are restricting access to your lands instead of becoming more inclusive you are doing the opposite! Many of us climbers go through a lot of effort to follow the current policies in place. What we need is more education around these policies not further restrictions.

Trying to enforce these policies on non-wilderness area is not feasible and you are outside your jurisdiction

Thank you for reading my comments.
