Comments: I strongly oppose changes in this plan that allow for additional motorized access within the Hoodoo Roadless Area/Great Burn Proposed Wilderness Area and support managing all 151,874 acres of the Hoodoo Roadless Area in Idaho as Recommended Wilderness.

This area is one of the largest unprotected roadless areas in the contiguous U.S., and reopening up an additional 40,000 acres for winter motorized use threatens the integrity of the ecosystem and sensitive species such as wolverines and mountain goats.
