Comments: Forrest Service Representative,

I am writing to urge you to re-consider the new legislation that would limit the placement of bolts on Forrest Service land. As a climber I have relied on these bolts as a way to explore the outdoors in a safe manner. I have also shared these experiences with many other friends who I would not have been able to take climbing if it were not for these bolts. They have allowed a meaningful way of interacting with the natural world for many people. I believe the vast majority of climbers respect the outdoors and work to make sure bolts are placed in a responsible and respectful manner.

Thank you for your time,
Skylar
