Comments: Hello, I have been Snowmobiling Granite Mountain area since 1984. We ride on the granite Mountain area until the January 15 closure every year. During the closure we never see a skier or boarder on the mountain. I see no reason for any closure let alone making it year round. Someone needs to look into where the money for this closure goes. Snowmobiles add a lot to the local Economy and you seem to just shut us out instead of adding more area. What is the benefit of the Brundage Sno-Cat operation to the local economy versus snowmobiles? Please send me the study showing this.
