Comments: Please don't prohibit fixed anchors and equipment! As climbers we're incredibly fortunate to have access to such amazing public lands. I think the impact of fixed anchors and other equipment is small and reasonable. I also worry that the restrictions will lead to unsafe conditions (people will continue to climb, but damaged fixed gear won't be identified or replaced). I encourage you to speak with The Access Fund for more insight on anticipated effects of the proposed changes. Thank you for your time.
