Comments: We need to restore old growth forests in the HNF and other national forests.

Leave mature forests alone - there is no way to hurry along the process that nature has to create an old growth forest, but there are many ways humans can thwart such natural ecological succession

Stop burning central hardwood forests. There no evidence fire was ever a significant disturbing influence within our forests

Stop logging mature hardwood forests.

We need to act now. We know the damaging effects cutting our old growth forests cause. We cant go back nor do we have the time it takes for these forests to replenish themselves. We need to preserve them now.
