Comments: I am writing in opposition of the granite mountain year round closure. Closing this year round would be a large blow to our outdoor recreation community that makes up a large part of the life of our community in valley county. I already opposed the Jan-March closure to public, this area really shouldn't be closed at all . I also support expanded motorized single track in the summer time and do not feel closing forest service roads to non motorized use is acceptable. More and more of our off road recreation is being taken away leaving less places for the motorized and ski community to go.
