Comments: Hello,

I hope this message finds you well. I am writing to you in hopes that you will not prohibit the use of bolts or climbing accessories of that nature. Being able to use bolts and other climbing accessories helps humans explore and immerse themselves in nature to the fullest extent while leaving minimal cosmetic and overall impact on their surroundings in nature. Being able to experience nature through climbing and other similar activities helps humans have a greater respect for the beautiful world that we live in and helps remind us to preserve these same ecosystems for our future generation.

Thank you for your consideration and I hope you have a great day.
