First name: Patricia

Last name: Archuleta

Organization:

Title:

Comments: Fixed Anchors and Fixed Equipment in National Park Service Wilderness Areas should be permanently prohibited. Keep the wilderness areas as wilderness; as they should be kept. The natural wildness is valuable and most of our environment has already been ruined by human use and recreation. Recreation should NOT be placed before conservation. Human use and abuse is the basic reason for deterioration of our planet. There is a serious overpopulation problem, and if organizations and businesses keep catering to mass humanity, there is no hope for the planet.
