Title:

Comments: Do not allow use of permanent fixed climbing anchors in Wilderness areas. This would destroy the very purpose of the wilderness designation- maintenance of pristine wilderness with their rare plant & animal life. There are plenty of spaces for climbing with embedded fixtures outside of the Wilderness area that climbers can use & climbers can use non- permanent objects such as ropes & slings within Wilderness, so that Wilderness does not need to be defaced & potentially opened up to greater encroachment by humans on the last areas of unspoiled nature. Wilderness is important to us all! Please continue to protect it- no to permanent fixtures in Wilderness rock faces!
