Title:

Comments: We don't let the public put walkways where they want. That kind of encouragement for parks use is what we don't want. We want as little defacing of nature as we can have and keep it enjoyable for those that stay on trails. I love climbing too but I don't expect to be able to deface nature temporarily or permanently. If I can't climb natural things the way they are I don't want to deface it.
