Title:

Comments: I am a motorized vehicle user. I have been volunteering with my club and association for over 50 years. In 2023 alone just my club alone volunteered over 3000 hours with the Forrest Service. We have been doing this since the 70's. We recognize the problem the Forrest Service has in getting enough funding to do the projects needed . This is why we do them. With the introduction of the side by side users, our job has increased 10 fold, but we continue to repair the trails and teach the new users the benefits of good stewardship of the Forrest, I understand you do not have any allowances for the motorized community in the new Forrest plan . This is not the way to adequately serve the public or the motorized user groups .
