Title:

Comments: Wilderness is an endangered landscape. Less than 3 percent of land in the Lower 48 is protected as Wilderness, and it is under threat, including from rapidly escalating recreation pressures. We should not be turning Wilderness in to recreational theme parks. The very definition of Wilderness is an area undisturbed by human activity. If we do not keep the Wilderness free of the human caused scars anchors and development will inflict, it will cease to be wilderness. We have a moral and ethical responsibility to preserve the Wilderness, as the natural heritage it has always been, for future generations.
