Comments: In considering the forest plan. Do NOT forget about motorized access. Motorized recreation is a huge part of forest use, utilized by most Oregonians. This can range from hunting access, atv use, and class II trails along with dispersed camping. Which my family along with many thousand others enjoy regularly. Along with positive financial impacts on communities this is also a multi generational tradition of forest use.

I also hope logging will be utilized as a way to maintain the health of our forest to keep it green for many generations.
