Comments: As an aging/SSI age off-roading enthusiast I hope motorized access remains available to me. The elderly are the largest growing segment of the population. As well as opportunities to share the vast outdoors with my grandchildren.

Off-road vehicle recreation stands out as a transformative outdoor activity that not only benefits a wide range of enthusiasts but also significantly enhances accessibility for individuals with mobile disabilities. By embracing adaptive technology, improving trail infrastructure, and fostering inclusivity, public lands can continue to provide a platform for diverse communities to connect with nature and enjoy the many benefits of off-road exploration. So well said.
