Title:

Comments: It is literally insane that old growth forests are being logged. OLD GROWTH FORESTS MUST BE PROTECTED!!!! Biomass is a false solution and releases massive amounts of carbon that drives climate changes. Please create the strongest protections for especially old growth forests possible AND for all forests! Georgia has beautiful forests. For wildlife, habitat loss is the number one reason besides climate changes for species extinctions and severe declines. My religious faith is an important reason why I am writing. We are at a point with climate change that we need to protect as many natural areas especially forests as we can. PLEASE CREATE A MORATORIUM OR AT LEAST A 10-YEAR PAUSE ON CUTTING DOWN TREES IN GEORGIA FOR DEVELOPMENT. PLEASE CREATE PERMANENT PROTECTIONS FOR ALL OLD GROWTH FORESTS.
