Title:

Comments: I believe strongly in preserving and restoring wilderness character wherever it exists on public lands, regardless of Wilderness Act status. I believe the best use of resources to this end is to fund NFS engineering and law enforcement programs to deter illegal motor vehicle travel and to actively decommission non-system-routes. I believe this will go farther to preserve wilderness character for the most users than the exercise of paying GS-13+ employees to write documents and respond to comments about bolting.

Also I support the messaging from the Access Fund which will be more constructive and forward-looking and less snarky and bitter than my own comments.
