Comments: Hello, I have been a resident of Oregon for 20 years and am adding my voice to comment on plans for old growth forests. It is critical for current and future generations to preserve ALL old growth forest in their entirety throughout the Pacific Northwest. That means no logging, ever for old growth forests. They sequester more carbon and have much more biodiversity than younger forests. Thank you for your efforts to save these forests, their benefit to fighting climate change is worth more than any short term logging effort. Help Oregon lead the way for the Northwest reducing global warming and saving old growth forests.
