Comments: In order to deliver on President Biden's Executive Order promises, there needs to be real protections for both mature and old-growth trees - including from the threat of logging and 'inappropriate management' techniques by the agencies.

Right now there is an opportunity to create the most significant federal land protection policy we have seen in more than two decades.

Future generations are relying on our leaders to make responsible choices, we owe it to them to protect the old growth and mature forests that remain.
