Comments: Thank you for the opportunity to object to the Nez Perce-Clearwater Final Environmental Impact Statement and Draft Final Forest Plan #44089. I object to the preferred alternatives proposed management of the Hoodoo Roadless Area and the plan's lack of wildlife standards for wolverines and mountain goats.

I provided a comment previously and stand by it. The Great Burn provides critical habitat for species that are integral to the health of the landscape and ecosystem as a whole.

The Forest Service should manage the entire Hoodoo Roadless Area (151,874 acres) as Recommended Wilderness. The Hoodoo Roadless Area provides important habitat for many sensitive species, especially near the Stateline, where this plan proposes removing sections of Recommended Wilderness.

Prohibiting winter motorized use in the Great Burn is critically important, as research has found that this use can detrimentally impact wildlife behavior and winter habitat. Additionally, the Forest Service must add binding wildlife standards to the forest plan to ensure species survival into the future.

I have had some incredibly memorable experiences in this stunning area and I would like to the Forest Service to manage it in such a way that ensures future generations can have similar experiences.

Thank you for considering my objection.
