Comments:

As an American citizen, advocate for public lands and a climber, I want to ensure the safe and responsible use of fixed anchors in National Forests remains available to the climbing community. I respect Wilderness areas and USFS lands, and believe that fixed anchors can be a component of a sustainable Wilderness experience. Please consider your climbing guidance to reflect the practice and precedent of the last 60+ years-that fixed anchors for climbing can be used, replaced, and maintained in designated Wilderness/national forest areas. This helps maintain safe public access to our amazing resources and keep public lands management and the climbing community aligned to the same goal of enjoying these lands responsibly and sustainably.
