Comments: My first experiences with Granite Mountain was prior to any snow cat skiing in this area, and using snowmobiles such as the 1978 Kawasaki Invader. We could make it up to the lookout on most days, and if we didn't make it all of the way to the lookout, we had a lot of fun trying. This mountain plays a very significant and historical role in the snowmobiling recreational opportunities for central Idaho, more so and longer than any other use of this mountain. I oppose the exclusion of one demographic of people (snowmobilers) while providing and favoring the use by another demographic of people (snow cat skiers). Furthermore, if motorized vehicles such as snowmobiles are a cause for concern, then why are other motorized over snow vehicles such as snow cats not of concern? I oppose the closing of Granite Mountain to over snow vehicles.
