Comments: Hello,

I would like to ask that you please consider including the Transportation road and trail system as a key issue in this planning process.

Roads are many times helped maintained by volunteer 4wd enthusiasts. They are used for hunting, resource management, as well as by wildlife.

please have a plan that takes all the public into account. A lot of times it seems like everyone is a hardcore conservationist because they are the loudest voice, but I believe the majority of the people want to be able to USE public lands while still having them managed for future use.

thank you for your time and consideration.
