Title:

Comments: USFS. I am and have been a canyoneer for 20 plus years. Canyoneering is my favorite past time and my job. Canyoneering is a way I connect with friends and family. Why in the world of all things would you want to take that away ? Of all the things going on in the world you want to make it even more difficult to live a life of happiness! How dare you take this away from the American people. This land is ours not yours the government. You sell off land to developers and gas companies and miners and you want to restrict a 1 inch bolt from inside a canyon that no one will see besides canyoneers. Have any of you making this decision ever explored a canyon? I hope so. Taking anchors away anchors only restricts access for the America people. Please do the right thing and believe in America again. Freedom and family and empowerment with us the people. Please consider keeping our canyons open my life depends on it. Thank you

Gerard Belli
