Comments: The cabins in Seymour Canal are for recreation BUT they are also for the safety of all boaters that are going through the area. We do not lock our doors but a no trespassing sign is posted. Over the years there have been many notes left that so and so used the cabin out of need. They thanked us and left everything like they found it.

Around 85, a small plane landed on the flats in front of Stan Prices. The temperature at the time was fifteen degrees. On take off they flipped the plane. No one was hurt. We picked them off the beach and three days and put them up in our cabin. Three days later they were in Juneau. Without our cabin we can only guess the outcome.

Please make it possible to transfer the permits.
