Comments: Hello. Please do not limit or negatively control the outdoor wilderness. I like to go outside and enjoy climbing; it helps with my mental health. Coming from indoor gym climbing, the outdoor climbing scene is something new to me. So far all of the gear placed on established routes has helped me safely learn how to climb outside. It would be very sad if I or other people were no longer able to climb some of these places due to lack of safety gear. Please listen to the people and do not try to negatively limit and control the outdoor wilderness & recreation areas. Thanks.
