Title:

Comments: I would advocate for adjusting the language of this proposal for the following reasons:

1. Prohibiting fixed anchors as installations is an extreme shift from past practice. This practice has been supported and managed successfully for several decades. This prohibition will restrict access to the places that are meant to be enjoyed by all, especially those who value nature and know how to treat it with care.
2. Prohibiting fixed anchors as installations is a safety issue. The ability to be safe in the wilderness, especially in unknown circumstances, is paramount. Additionally, it is important to be able to monitor already existing anchor systems. Not being able to monitor and potentially replace old and unsafe systems is irresponsible.

Thank you for your consideration.
