Title:

Comments: Please leave a comment at the link below to include us in any amendments to the Northwest Forest Plan. Here is the simple message I left (I am sure some of you can do much better):

Please include the federal transportation system of roads and trails in your Region 5 and Region 6; California, Oregon, and Washington; Forest Plan Amendment for Planning and Management of Northwest Forests Within the Range of the Northern Spotted Owl. I am a tax payer and contribute heavily to the economies in these areas. My friends, family, and myself use these public lands to recreate responsibly with our off-road motorized vehicles, and deserve to be included in any changes to the Northwest Forest Plan. Besides providing high-quality access for motorized recreation enthusiasts, the federal transportation system of roads and trails provides access for important wildfire suppression efforts and natural resource management projects. Thank you.
