Comments: Are you guys trying to get rock climbers injured more? There are only three types of rock climbing, you are taking away the safest one and you are going to push every rock climber to the two more deadly versions. They will have to climb with no ropes or they will have to use cams and wedges to place protection that cannot stand near the amount of force and cannot be placed near as frequently as bolt holes can be placed. It's a ridiculous notion that almost seems like the only goal is to make rock climbing more dangerous otherwise I don't see how this could even be considered.
