Comments: Whatever industry, albeit Big Oil, Gas, and now "outdoor recreation", endeavors to scar, ruin, alter, damage or otherwise caused permanent destruction to pristine areas, including protected wilderness areas to enhance their already bloated profit-seeking avarice needs to be stopped now! It is a national shame that pristine, protected wilderness areas are now their targets. It is mandated by law to disallow such intrusions and the special interest groups that advocate to ignore the laws regarding wilderness preservation are not to be exceptions.
