Title:

Comments: I am not in favor of allowing any more logging projects in the remaining old growth forests, or mature forests in the National Parks. We need to keep as much of that land as it is to protect the animals that live in those areas and to help combat climate change. I have spent a lot of time visiting the Redwood and Douglas Fir forests in Mendocino, Humboldt, Sonoma, and Santa Cruz counties in California.

We need to save the remaining 5% of the old growth Redwoods for as long as we can.
