Comments: We grew up reading Dr Seuss and the one that had the biggest warning about irrational, greed driven human behavior that in our lifetime would alter this Planet we're all GIFTED with, was the Lirax. Cut every tree until one has to see only photos in a museum. WHY are we on this trajectory when we have the power to STOP. Teach the VALUE of old growth NOT because of profit, but WISDOM. The indigenous peoples understood the intrinsic value and even today call them Grandfather. Knowledge is passed down from old growth to younger trees, white man is now learning this, scientifically. White men created monoculture forests, this is NOT a forest but a bunch of trees. Forests are beyond our understanding of real value, not just for us, but all life on Earth. Be wise about use of this gifted resource, let the Lirax stay in the storybook as a reminder of human foolishness that is knocking on everyone's door. Make good choices for ALL. We're slipping away fast. Look at the ONCE Amazon.
