Title:

Comments: I strongly oppose the installation of any structures prohibited by the Wilderness Act which would seem to include the proposed rock climbing assists. People have climbed rocks for years without such intrusive fabrications which unnaturally threaten to damage the rocks being climbed artificially. The Wilderness Act was I believe intended to protect wilderness not threaten or destroy it by unnatural means. Wilderness is not a recreation association or sports arena to be developed to draw all kinds of damaging human intrusion. Please let it be as the Wilderness Act intends, not to serve the whims of particular sporting enthusiasts.
