Comments: Not sure where to start. The government continues to create these plans with over 15000 pages and details all in an effort to keep the office staff busy and complicate the system to the point the average user of these areas can't begin to understand the direction. All in an effort to get the public land owners to walk away with disgust. From what I gather after spending numerous hours reviewing this plan it's simply a way to shed responsibility from the Forest Service to the Federal Government to manage MORE wilderness acres. I think it's high time the Forest Service steps up and does the right thing, MANAGE your timber ground as the tax payers expect. I am 100% opposed to ANY more acres being proposed for wilderness. The fish and game and the forest service needs to do their jobs!!. So again everything this "plan" is designed to accomplish can easily be done with local support with the right staffing and mindset. So again I do not support this plan and will continue to fight to keep the acres that are truly public lands open for recreation and our enjoyment. Lastly Im sure I didn't hit all 8 of your details needed for an objection to this plan. Again it's your way of discrediting the information. STOP running over the people of this state!!!.
