Title:

Comments: This policy would endanger a lot of the members of our community who like to recreate up on Mount Lemmon by rock climbing, including myself, my partner, and my whole group of friends. Being able to replace anchors is a vital part of rock climbing safety. I know that we all care about our community members here in Tucson, so please take a second to look at this policy and make a decision that would support safe, healthy, and active futures for everyone who wants to recreate here. Thank you for keeping an open mind and considering other options.
