Comments: Pretty simple - Leave No Trace. and I have been a technical climber.

Take a different route to the top. Sorry if you cannot climb this without bolting well then you cannot. I am a big MTN biker. Sure, I would love to bike in many wildernesses' areas here in CO, but I cannot, and I am extremely glad for that rule. It is WILDERNESS not a place to be run over by a bike. The bolting issue I see is the same. KEPP IT WILD!!!

Over time you must replace bolts, over time there will be weaker climbers that will put bolts in where they really are not needed.

Save the wilderness. NO hardware should be left.

I worked as a seasonal NPS ranger. Sadly, people really don't practice good wilderness etiquette.

Thank you

Fred
