Comments: I do not like the proposal and feel like this restriction discriminates against and limits access for those who rely on fixed anchors for rock climbing.

These edits would improve the proposal...

- The continued use of existing fixed anchors without further review, unless there are site-specific resource concerns;
- Allowing the maintenance of existing fixed anchors without prior approval, unless there are site-specific resource concerns; and
- The authorization and placement of new fixed anchors in the wilderness with a simple and efficient permitting process that does not require an MRA, as is current practice under NPS Director's Order 41.
- Creation of a Study Group with participation from the camp industry in the development of any guidelines related to climbing activities in the wilderness or wild areas.

Thanks for asking!
