First name: Melissa

Last name: Isaacs

Organization:

Title:

Comments: The use of fixed anchors in the Wasatch and across the United States allows new and seasoned climbers alike to use and appreciate the beauty of our outdoor spaces safely and responsibly. But taking away this access, you would not only be stripping people from their right to comfortably recreate, but you would also be posing a serious threat to the safety of our outdoors community as a whole. Please reconsider before taking away this access.
