Comments: Not being able to change old route bolts is very dangerous for climbers and a lot of routes are very popular and famous and very important to climbing and its history. There are a lot of people who climb and a lot of people whose life is just climbing, like a lot of professional climbers, so climbing routes are IMPORTANT. And climbing outdoors is very liked amidst climbers, it combines their favorite sport and beautiful views, so it's very important that you do not take away the beautiful climbing experiences from people in national parks.
