Comments: Please allow for the Access Fund to regulate the maintenance and care of our beloved outdoor routes. We have many experienced climbing advocates that will be great stewards for outdoor climbing areas. The amount of times I have been so thankful for a well maintained route with safe bolts and rappel stations has helped my climbing partners and I stay safe. If anchors are gotten rid of on classic routes, I wont ever be able to show my children's those adventures. With the growing popularity in climbing outside it is of great importance that we have bolts to protect the safety of experienced and new climbers in the sport.
Thank you for your consideration.
