Comments: Prohibiting anchor bolting is an idiotic policy. It will dramatically reduce the safety of those enjoy America's outdoors. A safe anchor system is the foundation for ascending a route safely, if you take the ability to properly maintain and replace established anchors, you will be putting lives in danger. It only takes 1 anchor to rip from the wall for someone to fall to their death. If you are fine with taking that life, then fine... stop us from keeping our sport safe.
