Comments: Hello, I just want to voice that I strongly support rock climbing and outdoor enjoyment of our taxpayer public lands. I think it should be continued, and is a valuable way to exercise and enjoy the outdoors. Please help us continue to rock climb!!!

Restricting the establishment of new routes to "existing climbing opportunities" on non-Wilderness lands is unenforceable and will create confusion amongst land managers and climbers. Non-Wilderness climbing management policy should maintain opportunities for new anchors unless and until analyses determine climbing should be restricted to protect cultural and natural resources.
